### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 28, 2003 has been entered.

### ***Response to Arguments***

Applicant's arguments with respect to claims 5 – 8 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Objections***

Claim 5 is objected to because of the following informalities: In line 9, the applicant claims that "said belt portion" in use is fastened around the waist of the wearer. The examiner suggests adding an "s" to the end of the word portion to clarify that both portions in use are fastened around the waist of the wearer, not just one belt portion. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 – 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hjorth (US 6,626,882).

With reference to claim 5, Hjorth discloses an absorbent article comprising a liquid permeable topsheet (3), a liquid impermeable backsheet (2) and an absorbent body enclosed therebetween (4); said article having a front portion, a rear portion and a crotch portion therebetween (col. 2, line 66 to col. 3, line 4); a pair of belt portions comprising a first belt portion attached to one side of the rear portion (9), and a second belt portion attached to an opposite side of the rear portion (10); said belt portion, in use, being fastened together around a waist of the wearer (col. 3, lines 9 – 12); said first belt portion carrying first fastening means (11), which in use, are attached against the outside of the second belt portion (col. 3, lines 9 – 12); said front portion exhibiting second fastening means (8), which in use, are attached to the belt portions such that the article will assume a pant shape, where the belt portions form a part of the waist portions of the pant (col. 3, lines 13 – 17); and each belt portion being provided with at least one indicium placed at an appropriate distance from an attachment of each belt portion to the rear portion (9a, 10a), whereby each indicium on the first belt portion has a corresponding indicium on the second belt portion (9a corresponds to 10a as shown

Art Unit: 3761

in figures 1, 2a and 2b), and each indicium on the first belt portion is symmetrically disposed in a longitudinal direction of the belt portions with corresponding indicium on the second belt portion as shown in figure 1.

The difference between Hjorth and claim 1 is the provision that in use a center line of the article is located at a center of the wearer's back.

While Hjorth does not explicitly state that in use a center line of the article is located at a center of the wearer's back, it would be obvious to one of ordinary skill in the art to place a center line of the article of Hjorth at a center of the wearer's back to ensure that the article provides the expected functions. If a centerline of the article is not placed on a center of the wearer's back (i.e. the article is placed off center from the wearer), then one would expect that the article may leak from the sides and allow undesirable soiling and also cause some discomfort to the wearer due to the unnatural positioning of the leg elastics, waist elastics, etc.

Regarding claim 6, Hjorth discloses the indicium as an ornamental design as set forth in col. 3, lines 53 – 58 and figures 2a and 2b.

As to claim 7, Hjorth discloses the indicium as a symbol as set forth in col. 3, lines 53 – 58 and figure 2a.

With reference to claim 8, Hjorth discloses the indicium as colored in col. 4, lines 8 – 13.
